

Sri Vignesh R

Aspiring Full Stack / Machine Learning Engineer — Data Science Enthusiast

✉ vigneshsri058@gmail.com ☎ +91-9360538154  linkedin.com/in/sri-vignesh-r

 github.com/SriVignesh2213

PROFILE

AI and Data Science undergraduate specializing in Machine Learning, Deep Learning, Natural Language Processing and Computer Vision. Experienced in developing AI solutions including resume matching platforms and digital image forensics systems using Python and PyTorch. Strong foundation in predictive modeling, data analytics, and applied artificial intelligence.

EDUCATION

KPR Institute of Engineering and Technology 2024 – 2028 | Coimbatore
B.Tech Artificial Intelligence and Data Science
CGPA: 9.1

Thaai Matric Hr.Sec.School, HSC / SSLC 2022 – 2024 | Madurai
HSC: 92.9% SSLC: 95.8%

TECHNICAL SKILLS

Programming Languages (Python, Java, C, JavaScript, Django, MySQL) | **Artificial Intelligence** (Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Predictive Modeling, Sentence Transformers, spaCy, NLTK, Transformers (Hugging Face), FAISS, ChromaDB) |
Data Engineering (ETL Pipelines, Apache Airflow, Spark, Pandas, NumPy, Data Processing) |
Tools and Platforms (Git(Version Control), GitHub, Tableau, Power BI, Streamlit, Docker, Azure(Basic Level)) | **Core Concepts** (Data Structures, Algorithms, OOPs,Statistics, Feature Engineering, Model Evaluation, Data Analysis) | **AI Tools** (ChatGPT, GitHub Copilot, Google Gemini, Claude, Hugging Face)

EXPERIENCE

ECLearnix Edtech Private Limited, Software Developer Intern 2025 – 04/2026 | Onsite

- **AI Document Automation:** Developed **DocForge**, an AI-powered document processing system using **Python, FastAPI, pdfplumber, PyMuPDF, and python-docx** to extract, process, and standardize unstructured research papers into publication-ready templates.
- **NLP & Template Mapping:** Implemented **Sentence Transformers** and **docxcompose** to perform semantic content matching and automate template-based document generation, improving formatting accuracy and reducing manual effort.
- **Backend Development:** Built scalable **FastAPI REST APIs** and optimized document parsing workflows, enabling efficient PDF-to-DOCX conversion while maintaining document structure and consistency.

- **Machine Learning Model Development:** Developed and optimized 6+ regression and classification models improving prediction accuracy by 15%.
- **Data Engineering:** Processed 4000+ academic records using preprocessing, feature engineering and data transformation techniques.
- **Model Optimization:** Enhanced model performance through hyperparameter tuning and cross-validation, improving accuracy by 18%.

PROJECTS

ResuMatch – AI Resume Job Matching Platform

Engineered NLP resume screening system processing 300+ resumes achieving 85% matching accuracy using TF-IDF and cosine similarity. Technologies: Python, FastAPI, React, NLP

TrueLens AI – Image Authenticity Detection

Developing deep learning computer vision system detecting AI generated images with 85% classification accuracy using CNN and FFT analysis. Technologies: Computer Vision, Neural Networks, Deep Learning

AI Powered College Management ETL System

Designing ETL data pipelines processing 2000+ student records for predictive academic risk detection. Technologies: Python, SQL, Airflow

ACHIEVEMENTS AND CERTIFICATIONS

Achievements and Certifications

- Won 1st Place at STEM Innovators EXPO 2025 – KPR Institute of Engineering and Technology
- Secured 2nd Place at BIT Season 2 Hackathon – Bannari Amman Institute of Technology
- Achieved 2nd Place at Vibecode'26 Hackathon – KSR Institute of Engineering and Technology
- Programming in Java – NPTEL Elite Gold Certification (Top 5%, Score: 90%)
- NumPy for Data Science Certification – Udemy (Hands-on numerical computing)

CODING PROFILES

Coding Profiles

- CodeChef  : Solved Data Structures and Algorithms problems across core topics.
- HackerRank  : Earned Python and SQL skill badges by solving coding challenges.
