INTERNSHIP

Autodesk (Software developer intern) . Onsite . Full-time

JULY 2024 - CURR

Worked in the Data storage and persistence part of ACT project, which increases the computation part of Fusion 360 by almost 25%
Reported bug and fixed on Compute validator, which is used by testers to find there is computation happening in that command or not.
Involved in active testing, git branch handling, bug solving and core data model works in Fusion 360 desktop application.

Global Knowledge Technologies (Generative AI Winter Internship) . Remote . Full-time

2024

Engaged in the development of **RAG-based Medical Chatbot**, actively contributing to generative AI model development.
Developed the Chatbot feature utilizing **Pubmed & Mixtral 8x7b model** along with frontend development in streamlit.
Integrated an adversarial search mechanism for effective responses sourced from a database of medical research papers.

PROJECTS

CODING PLATFORMS RATING PREDICTOR - Tech stack : Python, Pycharm, SQLite, Google Colab & GitHub - [LINK](#)

Designed and developed a web application utilizing Streamlit for predicting contest ratings on global platforms such as LeetCode, CodeChef, and CodeForces.

Created custom web scrapers using BeautifulSoup and requests to gather and store dataset for the machine learning model in CSV format within local storage.

Implemented machine learning algorithms to forecast contest ratings.

Deployed the application using Streamlit Cloud for accessible usage.

MULTI-LANG VOICE ASSISTANT - Tech stack : Python, PyCharm, GPT, GTTS & Streamlit - [LINK](#)

Implemented a user-friendly chatbot utilizing the GPT model for natural language understanding and generation.

Developed a translation system capable of producing results in multiple regional languages including Tamil, Malayalam, and Hindi.

Integrated functionality to generate audio responses for both textual and speech recognition inputs using GTTS.

Provided users with the option to manually select the language for the audio output produced by the model.

SMART ED - SYNC WITH SKILL - Tech stack : Python, Pycharm, Jupyter notebook, SQLITE & React - [LINK](#)

Led the development of a web application facilitating personalized suggestions for friends, courses, and job opportunities.

Integrated a YouTube summarizer feature to provide concise summaries of educational content available on the platform.

Implemented blockchain verification for certificate issuance and verification to ensure the authenticity of courses offered.

Enabled multi-language dubbing for course videos to cater to diverse language preferences and enhance accessibility.
